2006-UP

TransTec® overhaul kits listed above have been modified to include the 1,2,3,4/3,5,R drum bearing/seal (TransTec® part number B82668). This bearing contains the seal for 3,5,R balance oil. Freudenberg-NOK recommends that this bearing be replaced on every rebuild along with the support bushing in the drum. The bushing is responsible for sealing the 1,2,3,4 balance oil. (Bushing not included in kit).

All kits with a date code of 5/1/17 and later will include this seal

a brand of

FREUDENBERG-NOK
