

There are thousands of vehicle makes and models. We make power steering kits for nearly every one.

We created the best, most dependable line of power steering kits and components, and it grew to become the most comprehensive in the world. In fact, we offer significantly more applications than the next largest kit supplier, including current models that are still on dealers' lots.

That's why remanufacturers install more TransTec® power steering kits than all other brands combined.

Your customers **TRUST** you. You **TRUST** TransTec®.
