

TRANstec® TRUSTED

for Generations

Transmissions have changed a lot over the last 30 years. From 4-speed to 9- and 10-speed step units, to belt and chain driven CVTs, dual-clutch technologies and now EVT's. However, one thing has remained constant. TransTec® is a brand that is trusted by transmission professionals both locally and globally.

1984

"We don't think it's possible to overstate the importance of quality. This is especially critical to businessmen who are as profit-conscious as a successful transmission builder must be today. They know a comeback resulting from installing a cheap rebuilding kit that saved a few pennies can wipe out profits from several rebuilds...not to mention the loss of good will and referral business."

TODAY

"We are a relationship building and brand warehouse. We don't just sell parts; we build relationships with the transmission shops and our suppliers. And because we are a brand warehouse, we're proud to have partnered with the TransTec® brand all those years ago. Then, as well as now, it's a product both our customers and we continue to trust."
