

ENGINEERED SOLUTIONS in Every Kit

TransTec® kits are brought to you by Freudenberg-NOK Sealing Technologies, a global supplier of precision sealing products to all major OEMs.

Your customers **TRUST** you.
You **TRUST TRANStec®**

Freudenberg-NOK sealing rings with 3-D joints and manufactured using PEEK (polyetheretherketone) material.

- Engineered to minimize pressure degradation with their overlapping front to back and top to bottom design.
- Demonstrate a consistent, friction-optimized profile to minimize heat soak in material and application at critical sealing points.
- Keep power transfer loss and leakage rates low – even at high PV values.
