### **Mitsubishi F5A51 TransTec Overhaul Kit #2416**

TransTec overhaul kit #2416 is now available for the 1997-up Mitsubishi F5A51. This is a front wheel drive, 5-speed automatic which has been overseas since 1997 in models such as (but not limited to) the Mitsubishi Diamante, and appeared in the United States in 2001.

The F5A51 was first introduced in the U.S. in the 2001 Hyundai XG300 with a 3.0L V6. In 2002, the F5A51 was carried over to the XG350 with a 3.5L V6.

The unit resembles the 4-speed F4A51, with the most notable differences being the addition of a reducing brake assembly, a direct clutch assembly, and a direct planet carrier assembly.

TransTec kit #2416 is in stock and available for immediate delivery.

***TransTec overhaul kits contain genuine NOK seals, O-rings, D-rings, and molded seals, as well as premium paper and cork products.***
