

## NEW PRODUCT ANNOUNCEMENT

NPA 13, 8/02

### Chrysler A604 2000-Up Shift Solenoid Block Overhaul Kit TransTec #4960

Chrysler redesigned the shift solenoid block in 2000 for all A604s in current production, as well as for service of earlier models. The new design block has three solenoids with replaceable O-ring seals and Viton® cover seals. There is no separator plate, and only one gasket from the factory.

The revised solenoid assembly, Chrysler #5015646AB, retro-fits all A604 models from 1989 and up, and is a suggested upgrade during overhaul.

The new TransTec kit, #4960, is for 2000-up. Kit #4876 still covers 1989-99.

Kits include molded cover seals, NOK O-rings, premium Armstrong paper gaskets, replacement springs, diaphragms and filters.

Viton is a registered trademark of DuPont Dow Elastomers, L.L.C.
