Mercedes 722.6 5-Speed Overhaul Kits TransTec #2415 & 2411

Mercedes introduced its new 5-speed in various models starting in 1995. The designation for this series is 722.6.

TransTec is pleased to announce two new overhaul kits for the Mercedes 722.6 series 5-speeds:

Kit #2415 contains all of the sealing components *including* the bonded piston for the B1 brake, and the latex-coated intermediate plate. The plate seals up both the bell housing-to-case and the B1 brake housing-to-bell housing.

Kit #2411 contains all the sealing components *except for* the B1 brake bonded piston and the intermediate plate. This kit matches OEM kit #140 270 65 00.

Both kits are in stock and available for immediate delivery.
