

NEW PRODUCT ANNOUNCEMENT

NPA2003-4, March 2003

1994-Up 4T60E & 4T65E Side Cover Gaskets TransTec # 33204 & 33205

Beginning with the 1994 GM "W" body, the 4T60E incorporated an aluminum structural side cover. This new cover required a new style gasket that is made of a metal core with a molded rubber sealing edge.

With the introduction of the 4T65E in 1997, this model used the structural side cover from inception. However, it was a different shape than that in the 4T60E. TransTec is pleased to announce the availability of both the 4T60E and 4T65E side cover gaskets for bulk sales. These are in stock now and available for immediate delivery.

TransTec #	Reference #	Application	Years
33204	8683803	4T60E w/structural side cover	1994-99
33205	24204795	4T65E w/structural side cover	1997-up

TransTec #33205 (4T65E) shown here.
