

## NEW PRODUCT ANNOUNCEMENT

NPA2003-8, June 2003

### Chrysler 42RLE 2003-Up TransTec Overhaul Kit #2434

DaimlerChrysler's Jeep Liberty with the 3.7L V6 and all Wranglers now come equipped with the 42RLE for 2003-up. If the nomenclature looks familiar to you, then you've got half the battle won. This unit is basically a rear drive version (hence the "R") of the 42LE (A606) transaxle that has had its internals laid out straight. The transfer shaft/gears and differential assembly have also been done away with.

TransTec overhaul kit #2434 is conveniently sub-packed to eliminate the guesswork with the 2-4 & low/reverse D-rings. This kit is also available with a Duraprene pan gasket, kit #DP2434.

#### Select Premium Components

TransTec Number	Description	Years
11375	Duraprene Pan Gasket	2003-up
29056	NOK Converter Seal	2003-up
