

### E4OD Converter Hub Seal

TransTec is proud to introduce an updated converter hub seal for the E4OD / 4R100, TransTec part number **37012**. It replaces the blue silicone part number 29035. The seal is made of a proprietary Viton® compound that is exclusive to TransTec. The proprietary compound, combined with the NOK design and manufacturing process, makes this an ideal seal for this application.

In order to avoid confusion in the field, a bulletin similar to this will be included in the overhaul kits that contain this new seal. The part number (37012) and our NOK markings are on the seal for easy identification.
