

New Product Announcement

GM 4L60/65E 2004-UP

We are pleased to announce the availability of TransTec® Overhaul kit **#2472** for the 2004-up 4L60/65E units. In mid-year of 2004 General Motors changed the case and pump assembly on both units. The groove has been eliminated from the pump and a chamfer has been added to the case to accommodate a wedge seal.

Our newest addition to the 4L60E family contains the new wedge seal and the pump lathe cut seal, and is also available with a Duraprene® pan gasket, kit **#DP2472**.

For your convenience we offer the new seal in bulk - TransTec **#B33001**.

Both kits are in stock and ready for immediate delivery!
