

Transtech **Bulletin**

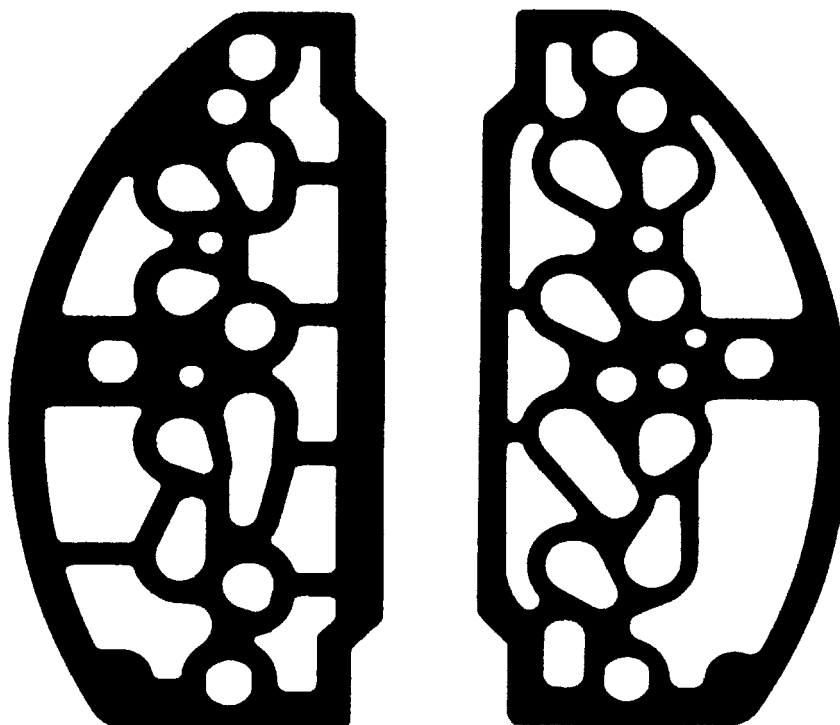

APPLICATION: Chrysler A604
SUBJECT: Solenoid Body Gasket 1989-Up

The Chrysler A604 solenoid body and gasket have been substantially revised. Brought out for production and service in 2000, the new assembly requires only one gasket between the case and solenoid. The new assembly will eventually supersede all previous solenoid bodies in production and service.

THE SEPARATOR PLATE MUST BE DELETED WHEN USING THE NEW DESIGN SOLENOID AND GASKET ON 89-UP MODELS.

TransTec #12544, Chrysler #4659982, will be added to all gasket sets and overhaul kits with date codes of E00 or later.

Solenoid assembly #5015646AB will retrofit to all models 1989-up when used with the latest design gasket.

NEW
TRANSTEC #12544
CHRYSLER #4659982

OLD
TRANSTEC #12888
CHRYSLER #4799844AB
