Subject: Valve Body Gaskets

TransTec is improving the packaging of the Valve Body Gaskets for this Mazda and Ford application. They were both loose in the kit and a sub kit for the late model units. We have now incorporated two separate sub kits for early and late model units. The early gasket set includes one set of gaskets with a yellow ink stripe, these are for all Ford applications 1991-97 and 1996-only Mazda applications
