**Application:** Hyundai A4AF1/2, A4BF1 95-Up  
**Subject:** Valve Body Gaskets

Starting with the 1995-Up Accent, Hyundai made available separate gaskets for the auxiliary and main Valve Body assemblies. This also applies to the Elantra 1996-Up and the 1997-Up Tiburon applications. All three applications require the same separator plate numbers and have the same gaskets. TransTec is now including the gaskets for these applications in the Hyundai overhaul kits. The gaskets will be packaged in a convenient sub kit, #132. This was added to the kits with a date code of G00 or later.

TT#	Description
12548	Auxiliary Valve Body Gasket, lower
12549	Auxiliary Valve Body Gasket, upper
12550	Main Valve Body Gasket, upper
12551	Main Valve Body Gasket, lower
