**Application:** Chrysler A404/413/470/670  
**Subject:** Governor Feed Screen

As a service to rebuilders, TransTec has added the Governor Feed Screen to all of the three speed, front wheel drive Chrysler applications. This screen should be replaced during an overhaul to reduce the chance of the Governor Valve sticking, creating second gear starts, and erratic shift patterns. TransTec #87114, OEM #5205839, is included in all kits with a date code of H00 or later. This screen is also available for bulk sales.
