**Application: General Motors**  
**Subject: 4T65E 1997-UP**

General Motors has altered the case to cover gasket of the 4T65E slightly for all models from 1997-up. The upper case to cover gasket has had an opening eliminated to aid in avoiding potential gasket blowouts.

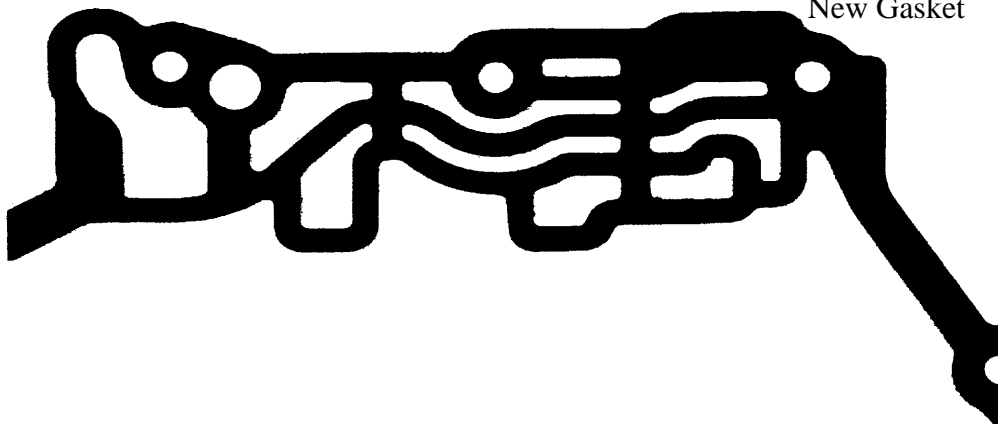

This is a running change at General Motors and will replace the previous gasket in all models. All kits with date codes of A01 or later will contain the updated gasket. Please see the illustration below.
