

## Bulletin

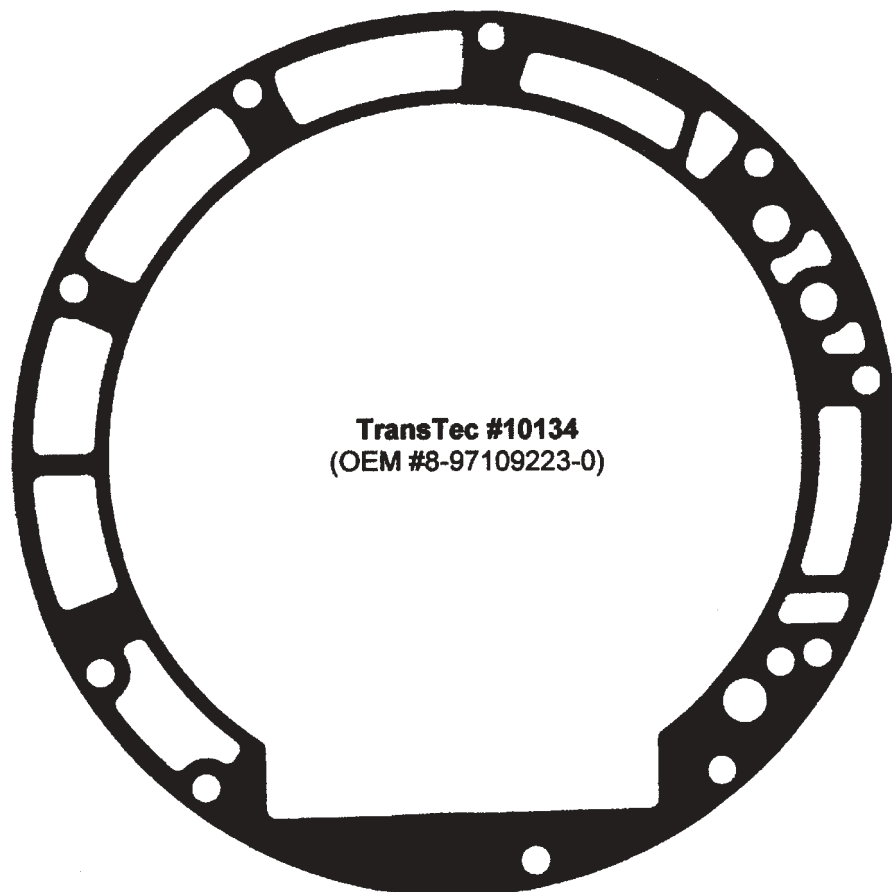

**Application: Jatco JR403E**

**Subject: Pump Gasket Update**

The pump gasket for the Jatco JR403E has been changed from a paper material to a latex-coated, metal gasket. The new gasket offers superior protection against blowout.

In keeping with our OE quality commitment, we will also be offering this gasket in our Overhaul Kits. The TransTec part number for the gasket is #10134 (OEM #8-97109223-0).

All TransTec kits with a date code of K01 and later contain the new gasket.
