

2007 Honda Fit TransTec® Kit Number 2491

TransTec® overhaul kit number **2491** was initially introduced in 2007 to cover the 2006-up Honda Civic 5 speed transmission with SPCA transmission case code. We are proud to announce this kit has been updated to expand coverage to include the 2007-up Honda Fit 5 speed transmission with an SMMA transmission case code. Additional components added to the kit are gaskets for the converter case, the solenoid cover and the left side cover.

All **2491** overhaul kits now contain the additional components required for units with transmission case code SMMA.
