

Bulletin

Application: Saturn TAAT
Subject: Valve Body Gaskets

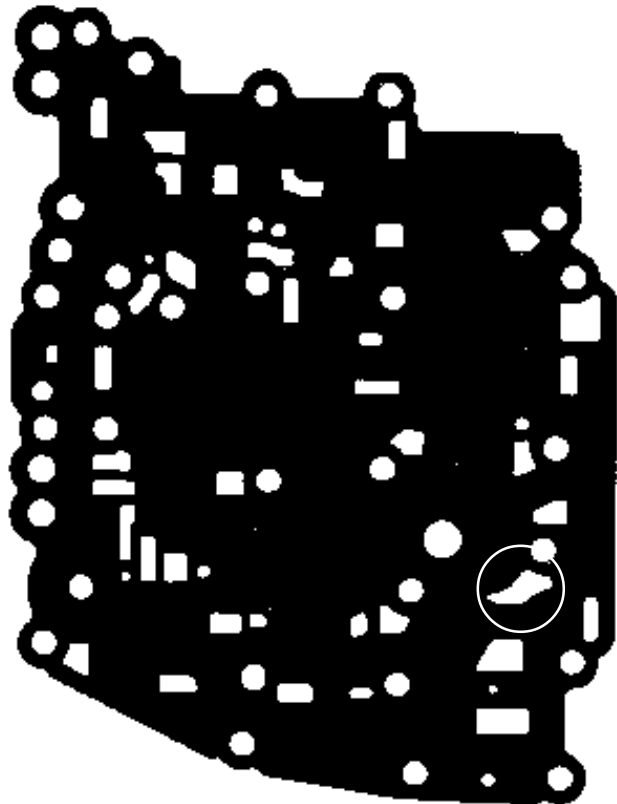

Since its inception in 1991, the Saturn TAAT unit has had three different valve body gaskets:
1991-early 1992: OEM #21002527, TransTec # 12521 (original set)
Late 1992-1996: OEM #21002390
1997-up: OEM #21003530

TransTec has used only one set of gaskets, TransTec #12523, to cover all late 1992 and later units. It has been brought to our attention that using these gaskets on the late 1997-up valve body assemblies can potentially create a cross-leak if not installed carefully.

In light of this information, we have added the 1997-up gaskets to all TransTec kits. The part number is **12291**. The 1997-up gaskets are very similar to the 1992-96 gaskets (TransTec #12523), with the only difference being the shape of one hole. See illustrations below.

1992-96, TransTec #12523 (OEM #21002390)

1997-up, TransTec #12291 (OEM #21003530)
