

2008 HONDA CIVIC LX 5 SPEED 1.8L Transmission Code MPCA

TransTec® overhaul kit number **2491** was initially introduced in 2007 to cover the 2006-up Honda Civic 5 speed transmission with an SPCA transmission code. It was later updated to cover the 2007-up Honda Fit 5 speed with an SMMA transmission code as well. We are proud to announce that coverage has now been expanded to also include the 2008 Honda Civic LX 5 speed transmission with an MPCA transmission code.

All **2491** kits contain the necessary sealing components for units with SPCA, SMMA and MPCA transmission codes.
