

## Bulletin

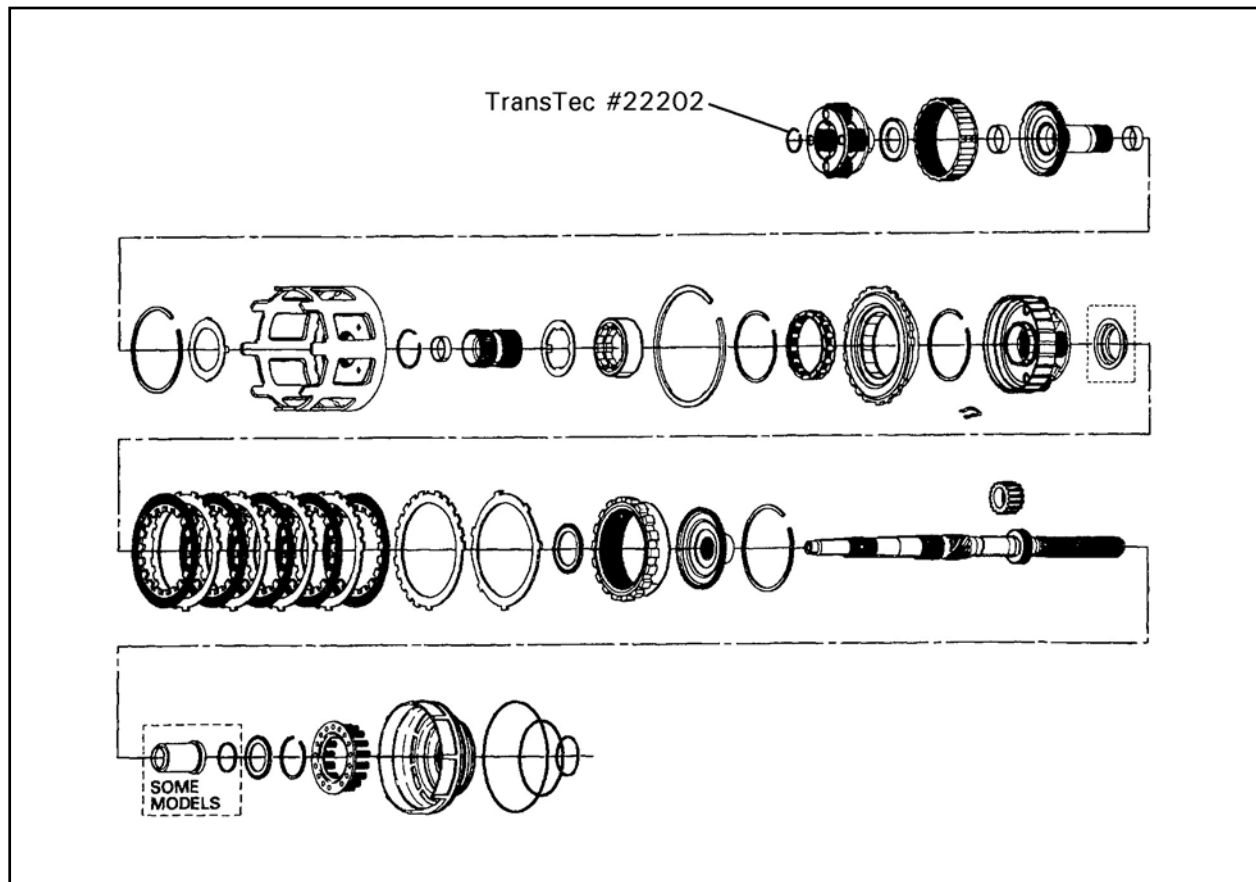

**Application:** GM 4L60/E

**Subject:** Retainer Snap Ring Now in TransTec Kits

During disassembly, it is not uncommon to distort the output shaft retaining snap ring on both the 4L60 and 4L60E transmissions.

TransTec is pleased to announce the addition of the output shaft retainer snap ring for the 4L60 & 4L60E transmissions under TransTec #22202 (GM #8654141).

All 4L60 & 4L60E gasket/seal and overhaul kits with a date code of **F03** and later include an output shaft retainer ring.
