

## Bulletin

**Application:** Chrysler 41TE (A604) 1989-Up; 42LE (A606) 1993-Up; 42RLE 2003-Up  
**Subject:** Revised Low/Reverse Clutch Retainer Gasket

The 42RLE, new in model year 2003, uses a new low/reverse clutch retainer gasket. The new gasket looks similar to the previous A604 part, but with the slight revision of an added notch in the new gasket (see illustration).

Chrysler is superceding the previous gasket #4431649 with the new part #4800253AA as stock is exhausted. All TransTec overhaul kits for the 42RLE have been built with the new gasket (TransTec #36115), and we are also switching to it in all A604/A606 kits as current gasket stock is depleted.
