Application: Toyota A245/246E 2003-up
Subject: Main Valve Body Plate Gaskets

It has been brought to our attention that some 2003-up Toyota A245E & A246E transmissions came from the factory without gaskets on the main valve body separator plate (large plate). All 2003-up TransTec kits contain the main valve body separator plate gaskets for units that came from the factory with the gaskets. **If your unit came in without gaskets on the large separator plate then it reassembles without gaskets on the plate.** As with all valve body gaskets, no holes should be covered when checking the gasket against the separator plate. If your valve body plate has holes covered up by our gasket then you have a valve body that does not take gaskets on the large main plate.

For the small separator plate, we offer two different sets of gaskets. Use the set that does not cover any holes on your separator plate.
