

TransTechnical Bulletin

TB19 8/99

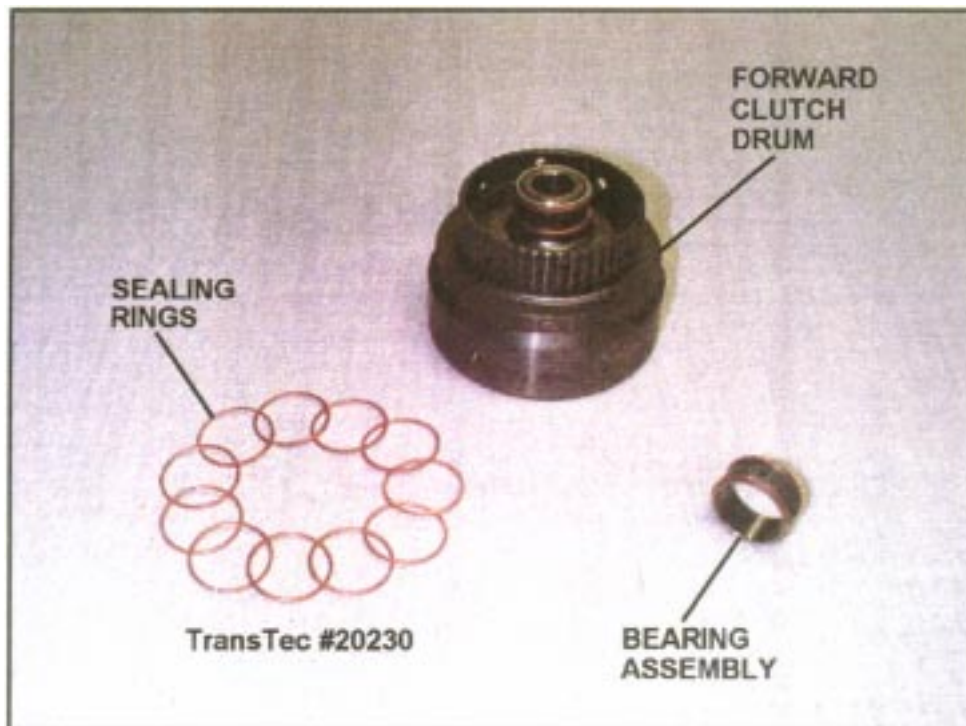

Application: 4R44E, 5R55E
Subject: Sealing Rings

We are pleased to announce the availability of the forward clutch sealing rings for the 1997-up 4R44E and 5R55E. These rings are a bronze-colored alloy made especially for use with the captured bearing assembly on the forward clutch drum.

These rings were previously only available by purchasing the entire bearing assembly. The addition of these rings completes TransTec ring kit #3424 for the 4R44E and 5R55E.
